

MATERIALS EXCHANGE NETWORK

THE NETWORK

The Materials Exchange Network is an online platform that facilitates the exchange of materials between organizations, companies, and service providers to divert waste from landfill.

HOW IT WORKS

The network allows organizations to offer and request materials, and connect with one another, online. It is supported by staff who can facilitate interactions to increase the likelihood of successful exchanges.

DIVERT FROM LANDFILL | LOWER COSTS | MAXIMIZE VALUE OF RESOURCES

2

CREATE A FREE ACCOUNT

Partners in Project Green can:

- Help you set up your account.
- Help you create listings for your materials.
- Keep contact information confidential until you agree to share with users interested in your listings.

3

LIST YOUR MATERIALS

- Post materials you would like to offer and/or receive.
- Provide basic data on your materials to interest other users.

4

EXCHANGE

- Send/receive a request for materials
- Review requests from other users and share your information if interested in exploring the opportunity.
- Receive staff assistance, as the network is actively supported.

Before: Infected Ash Trees

After: Locally Sourced Lumber

2014 RESULTS 20+ EXCHANGES | 200+ TONNES
